**Project Location**

**Area of Remodel**

**General Notes**

1. All work shall comply with local codes, Oregon state codes, amendments, rules, regulations, ordinances, laws, orders, approvals, etc. That are required by governing authorities. In the event of conflict, the most stringent requirements shall apply. Requirements include, but are not limited to, the following:
   2. Oregon Administrative Code
   3. National Fire Protection Association

2. Contractor shall examine and verify conditions of the job site. Any discrepancy between drawings and existing conditions should be recorded in writing and reported to the architect for resolution prior to commencement of work.

3. If any discrepancies are discovered in the plans, contractor shall notify the architect and owner in writing, and bid the more expensive option.

4. All dimensions noted in floor plans and sections are to finish unless noted otherwise. Notify architect of any discrepancies or conflicts prior to subsequent work. Do not scale drawings.

5. Material choices, fixtures, adhesives, and finishes not specified shall be pre-approved by owner and architect.

6. All change orders shall be submitted and shall be approved by architect and owner prior to execution of work.

7. Wood in contact with cement or masonry shall be pressure treated.

8. Provide access to concealed valves, dampers, controls, electronic junction boxes, etc. Obtain architects approval in locating access doors prior to installing.

9. Piping, conduit, rough-in and similar work shall be concealed unless noted otherwise.

10. Site to be broom cleaned at end of day daily.

11. All new construction to comply with latest edition of campus standards.

12. No MC cable permitted in project.

13. Whether or not this is described on the demolition plans, contractor shall determine the extents of removal and repair of finishes to perform the work, including access to, and replacement of, systems and equipment. Contractor shall include this in the scope of work.

**Project Description**

**Scope of Work:**

Summary: Remove existing non-bearing furniture panel walls. Install non-bearing interior walls to create two offices & storage room. Selective demolition of non-bearing interior wall to allow pass through between 10C and 10D. Revise mechanical, electrical, and data/comm. systems.
